

Year 13**Physiology of Human Body Systems.**

This unit covers: the impact of disorders of the musculoskeletal system and corrective treatments, the disorders on the physiology of the lymphatic system and corrective treatments & the physiology of the digestive system and the corrective treatments for dietary-related diseases.

Science Investigation Skills

This unit, will develop the skills underpinning practical scientific investigations. As well as drawing on Unit 1 and Unit 2, these skills will be delivered through subject themes ranging from enzymes and diffusion to electrical circuits. The subject themes provide different contexts for the development of the investigative skills.
